What Are the Key Risks?

The value of shares in the Fund and income received from it can go down as well as up and investors may not get back the full amount invested. Performance may also be affected by currency fluctuations. Currency fluctuations may affect the value of overseas investments. The Fund invests mainly in the equity securities of emerging markets around the world, which have historically been subject to significant price movements, frequently to a greater extent than equity markets globally. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods. Other significant risks include: emerging markets risk, foreign currency risk, liquidity risk, Chinese market risk. For full details of all of the risks applicable to this Fund, please refer to the "Risk Considerations" section of the Fund in the current prospectus of Franklin Templeton Investment Funds.

Glossary

**Dividend Yield:** The annual dividend received on an equity security as a percentage of the price. For a portfolio, the value represents a weighted average of the stocks it holds. It should not be used as an indication of the income received from this portfolio.

**Price to Book:** The price per share of a stock divided by its book value (i.e., net worth) per share. For a portfolio, the value represents a weighted average of the stocks it holds.

**Price to Cash Flow:** Supplements price/earnings ratio as a measure of relative value for a stock. For a portfolio, the value represents a weighted average of the stocks it holds.

**Price to Earnings (12-mo Trailing):** The share price of a stock, divided by its per-share earnings over the past year. For a portfolio, the value represents a weighted average of the stocks it holds.

**Standard Deviation:** A measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.
