PRODUCT SUITABILITY

WHO IS THE PRODUCT SUITABLE FOR?

The Fund is only suitable for investors who:

- seek a high level of income and prospects of capital appreciation;
- seek to access a portfolio of high yield debt securities from issuers worldwide; and
- plan to hold their investment for the medium to long term.

The principal may be at risk.

Further Information
Please refer to "Fund Information, Objectives and Investment Policies" of the Luxembourg Prospectus.

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in an open-ended collective investment scheme (referred to as an undertaking for collective investment in transferable securities" or UCITS) constituted in Luxembourg that aims to provide you with a high level of income and prospects of capital appreciation by accessing a portfolio of high yield debt securities from issuers worldwide.
- It is anticipated that under normal circumstances, you will receive, in the case of investments in distribution share classes, regular distributions out of income depending on the distribution share classes you are investing in. Subject to any legal or regulatory requirements, distributions may also be made out of the capital, net un/realized capital gains and income gross of expenses of the Fund which will result in a reduction in the net asset value of the Fund.

Refer to "Investment Objective, Focus and Approach of the Funds" section of the Singapore Prospectus, and the "Dividend Policy" section of the Luxembourg Prospectus.

Investment Strategy

- The Fund will invest principally in debt securities of issuers in any country, including emerging markets.
- It may also invest, amongst others, in (i) other types of securities, including equity securities, credit-linked securities and other debt securities including mortgage- and asset-backed securities (including collateralised debt securities), or (ii) shares of other mutual funds (limited to 10% of its net assets), or (iii) securities in default (limited to 10% of its net assets) (securities are said to be in default when the issuers are not currently making interest payments).
- The Fund can use derivatives for hedging, efficient portfolio management and/or investment purposes.
- The Fund may invest up to 25% of its net assets in debt securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority) with a credit rating below investment grade at the time of purchase.

Refer to "Investment Objective, Focus and Approach of the Funds" section of the Singapore Prospectus.

¹The Prospectus (comprising the Singapore and Luxembourg Prospectuses) is available for collection from the office of Templeton Asset Management Ltd at 7 Temasek Boulevard, #38-03 Suntec Tower One, Singapore 038987 and its appointed distributors during business hours, or accessible at www.franklintempleton.com.sg.

KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

The value of the product and its dividends or coupons may rise or fall. These risk factors may cause you to lose some or all of your investment.

Refer to “Risk Factors” section of the Singapore Prospectus and “Risk Considerations” section of the Luxembourg Prospectus.

Market and Credit Risks

You are exposed to both developed and emerging markets.

- Emerging markets tend to be smaller and less liquid than developed markets as well as being more sensitive to economic, political and regulatory uncertainties.

Your investments are subject to interest rate risk.

- Movements in interest rates may negatively affect the value of the Fund's investments in debt securities. Debt securities with longer-term maturities tend to be more sensitive to interest rate changes than shorter-term securities.

You are exposed to credit risks of issuers.

- If an issuer fails to make principal and interest payments when due, the value of your investment in such issuers will be adversely affected. This Fund invests principally in corporate securities where there is generally greater risk of default than in the case of government securities.
- The Fund may invest in low-rated, unrated or non-investment grade debt securities or instruments. Such investments may fluctuate significantly, more so than investment grade securities, and there is a greater likelihood that the issuer may default, subjecting your investment to losses.

Your investments are subject to currency movement risks.

- Securities held by the Fund may be denominated in currencies different from its base currency. The Fund may seek to hedge currency exposures or take a currency position for investment purposes, exposing your investments to losses if currencies move against these positions.

Liquidity Risks

Fund liquidity may be affected during exceptional circumstances.

- The Fund may not be able to easily sell securities during an economic event or due to deterioration in the creditworthiness of issuers in which it invests.
- Shares of the Fund may be redeemed on any Dealing Day. However, during a period when trading on relevant exchanges or the over-the-counter market is substantially restricted or when market conditions make it impracticable to dispose of or value any of the Fund's investments, redemption of the Shares may be suspended.
- Redemptions of Shares may be deferred when more than 10% of the value of the Fund's Shares are redeemed or exchanged on any one Dealing Day.

Refer to the sections “Sale of Shares” and “Suspension of Valuation, Issue, Sale and Switching of Shares” of the Singapore Prospectus.

The Fund is not listed.

- There is no secondary market for the Fund. All redemption requests should be made to the Singapore representative, either directly or through the financial advisor or distributor from whom you purchased the Fund.

Product-Specific Risks

You are exposed to derivative risk.

- The Fund may invest in derivatives which may be purchased on regulated markets or over-the-counter and may have less liquidity than conventional assets, exposing the Fund to higher risks and potential losses.
- The Fund may invest in structured products and derivatives such as credit-linked securities, credit default swaps, total return swaps, interest rate, index or foreign exchange swaps, futures, forwards, and options, all of which are subject to significant liquidity and counterparty risks.

Your investments are subject to prepayment and extension risk.

- With mortgage- and asset-backed securities, principal is paid back over the life of the security rather than at maturity. Such securities are subject to prepayment risk, when interest rates fall, resulting in a shortening of maturities and foregone future interest payments, as well as to extension risk when interest rates rise, resulting in longer maturities and greater sensitivity to changes in interest rates.

You are exposed to collateralized debt obligations risk.

- Collateralized debt obligations are securities backed by a pool of assets where there is the risk that the underlying securities may not make interest or principal payment, may decline in value, or may be subordinate to other classes of securities that have priority as to payment, causing the value of the CDOs to decline.

VALUATIONS AND EXITING FROM THIS INVESTMENT

HOW OFTEN ARE VALUATIONS AVAILABLE?

- Daily valuations are available on Dealing Days, which refer to days which are both Valuation Days and Singapore Business Days (as defined below), or otherwise as the Directors may from time to time determine.
- A “Valuation Day” is a day on which NYSE is open or banks in Luxembourg are open for business, other than during suspensions of normal trading. A “Singapore Business Day” is a day (except Saturdays, Sundays and public holidays) on which commercial banks are open for business in Singapore.
- The indicative net asset value (NAV) and actual NAV per share of each Fund and Share Class may be obtained from the Singapore representative and will be published on the Singapore representative’s website (www.franklintempleton.com.sg) one Singapore Business Day after the relevant Dealing Day.

Refer to the “Purchase of Shares”, “Sale of Shares” and “Obtaining Price Information” sections of the Singapore Prospectus.

² Based on the lesser of the value of Shares being sold (exclusive of reinvested dividends) or the total cost of Shares when purchased

³ Payable to principal distributor, based on the applicable average net asset value

⁴ Payable to custodian, registrar and transfer, corporate, domiciliary and administrative agent (as applicable)

VALUATIONS AND EXITING FROM THIS INVESTMENT

HOW CAN YOU EXIT FROM THIS INVESTMENT AND WHAT ARE THE RISKS AND COSTS IN DOING SO?

- To exit the Fund you should complete the relevant sale form, together with such other documents as may be required and submit it to the Singapore representative or through the financial advisor or distributor from whom you purchased the Fund, the Internet or any other sales channels, if applicable. Please ensure that all relevant documents have been submitted.
- Some appointed distributors may offer a cancellation policy whereby you will not incur the sales charges if you sell during the relevant period (the Fund does not offer such cancellation policy). You will however take the risk of a decline in the Fund's NAV since you purchased it and certain administrative fees may apply.
- Sale proceeds will be paid within three Singapore Business Days following the Dealing Day of the receipt and acceptance of the sale request.
- Your exit price is determined as follows:
 - If the Singapore representative receives and accepts the sale request on or before 4 p.m. on a Dealing Day, you will be paid a price based on the net asset value of the Shares applicable on that day.
 - If the Singapore representative receives and accepts the sale request after 4 p.m. on a Dealing Day, you will be paid a price based on the net asset value of the Shares at the close of the next Dealing Day.
- The sales proceeds that you will receive will be the exit price multiplied by the number of shares sold, less any charges. The following illustrates the sales proceeds on a sale of 1,000 Class A SGD share class shares at an exit price of S\$12.50 and assuming no Contingent Deferred Sales Charge:

Exit price x Number of shares sold = Gross Sales Proceeds
S\$12.50 x 1,000 = S\$12,500

Gross Sales Proceeds – Exit Charges = Net Sales Proceeds
S\$12,500 – S\$0.00 = S\$12,500
