KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in an open-ended collective investment scheme constituted in Luxembourg as a UCITS that aims to provide you with a high level of income consistent with capital preservation by investing in debt securities from US issuers with a duration of less than 3 years.
- Under normal circumstances, you will receive regular distributions out of income depending on the distribution share classes you are investing in. Any distributions out of the capital of the Fund will reduce the NAV of the Fund.

Refer to “Investment Objective, Focus and Approach of the Funds” section of the Singapore Prospectus, and the “Dividend Policy” section of the Luxembourg Prospectus.

Investment Strategy

- The Fund will invest primarily in US debt securities issued by governments and corporations including mortgage- and asset-backed debt securities with a targeted average duration of less than 3 years. The Fund may participate in mortgage dollar roll transactions.
- The Fund will have an allocation to fixed income securities of at least 75%.
- In addition, the Fund may also purchase or sell mortgage-backed securities (issued by Government National Mortgage Association (GNMA), Federal Home Loan Mortgage Corporation (Freddie Mac) and the Federal National Mortgage Association (FNMA)) on a delayed delivery or forward commitment basis through the “to-be-announced” (TBA) market. With TBA transactions, the particular securities to be delivered are not identified at the trade date but the delivered securities must meet specified terms and standards (such as yield, duration, and credit quality) and comply with the

Refer to “Investment Objective, Focus and Approach of the Funds” section of the Singapore Prospectus.

Fund's Investment Objectives and Policy. Investments in TBA securities will not exceed 20% of the Fund's net assets. The Fund may only enter into TBA sale trades or TBA roll transactions with respect to securities which it owns. • It may also invest, amongst others, in (i) debt securities of non-US issuers (limited to 25% of its net assets), and (ii) low-rated or non-investment grade debt securities (limited to 20% of its net assets). • The Fund can use derivatives for hedging, efficient portfolio management and investment purposes. • The expected level of exposure that could be subject to securities lending transactions amounts to 5% of the Fund's net assets, subject to a maximum of 50%.

KEY RISKS	
WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of the product and its dividends or coupons may rise or fall. These risk factors may cause you to lose some or all of your investment.	Refer to the "Risk Factors" section of the Singapore Prospectus and "Risk Considerations" section of the Luxembourg Prospectus.
Market and Credit Risks	
• Your investments are exposed to debt securities risk – Debt securities are sensitive to changes in interest rates, widening of credit spreads and defaults risk of issuers. A fixed income security's value will generally increase in value when interest rates fall and decrease in value when interest rates rise. • Your investments are exposed to currency risks – The Fund is exposed to the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.	
Liquidity Risks	
• Your investments are exposed to liquidity risks of the underlying investments – Under exceptional market conditions the manager may be forced to sell assets of the fund at a discount in order to meet continued redemption requests. • The Fund is not listed, and you can realize your Shares only on Dealing Days – There is no secondary market for the Fund. All redemption requests should be submitted in the manner set out in the Prospectus. • Your realization request may be deferred or suspended – Redemptions of Shares may be deferred when more than 10% of the value of the Fund's Shares are redeemed or exchanged on any one Dealing Day. Your right to realize Shares may also be temporarily suspended under certain circumstances as described in the Prospectus.	Refer to the sections "Sale of Shares" and "Suspension of Valuation, Issue, Sale and Switching of Shares" of the Singapore Prospectus.
Product-Specific Risks	
• You are exposed to derivatives risk – The Fund may invest in financial derivative instruments which may be purchased on regulated markets or over-the-counter and may have less liquidity and more volatility than conventional assets, exposing the Fund to higher risks and potential losses. When financial derivatives contracts are traded over the counter, the Fund may find itself exposed to risks arising from the solvency of its counterparties and from their ability to respect the conditions of these contracts.	

- **Your investments are exposed to securitized assets risk** – Investment in securities which generate return from various underlying groups of assets such as mortgages, loans or other assets may bear a greater risk of loss due to possible default of some of the underlying assets.
