<p>to 10% of the Fund's net asset value); and (iii) derivatives providing exposure to any or all of the following: debt securities, interest rates, currencies and fixed income indices meeting the eligibility requirements of the Central Bank of Ireland.</p> <ul style="list-style-type: none"> • The Fund is permitted to invest in mortgaged-backed securities that are structured as debt securities as well as structured notes and securitised participation in loans that are transferable securities. • The total weighted average duration of the Fund's investments will range between -5 and +7 years, depending on the Investment Manager's forecast for interest rates and yields. • It is anticipated that the Fund may be leveraged up to 200% (under normal market conditions) and up to 500% (under exceptional circumstances) of its net asset value, with potentially all or a significant portion of such exposure being generated by short positions. • The long/short approach of the Investment Manager enables them to take substantial positions in assets they believe to be overvalued and in assets they believe to be undervalued, as long as market liquidity characteristics are supportive. The Investment Manager's investment approach incorporates analysis of material environmental, social and governance (ESG) issues that may impact an investment's performance. The Investment Manager intends to employ an active currency strategy. • The Investment Manager employs an actively managed strategy to invest in a combination of Investment Grade and high yield bonds. Although the Fund may purchase debt securities rated below Investment Grade, the Fund will only purchase those debt securities rated at least B- or its equivalent by an NRSRO or, if unrated, deemed to be of comparable quality by the Investment Manager. • The Fund's benchmark index is the FTSE 3-month US Treasury Bill Index (the "Benchmark"). The Fund is actively managed, and the Investment Manager has discretion in selecting investments within the Fund's objective and investment policies. The Investment Manager seeks to provide an average annualised return for the Fund, on a gross basis over rolling 3-year periods, equal to the return of the Benchmark plus 2%. There is no guarantee that the Investment Manager will meet its target, and the targeted return does not take into account the fees charged, which will reduce the Fund's return. The Benchmark does not constrain how the Investment Manager manages the Fund. • The Fund may also invest extensively in certain types of derivatives for efficient portfolio management purposes and/or investment purposes. • Due to the investment policies of the Fund, the Fund may have particularly volatile performance. 	<p>of the Prospectus for further information on the investment strategy of the product.</p>

<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> • The Fund is constituted as a sub-fund under the Irish-domiciled Franklin Templeton Global Funds Plc. • The Manager is Franklin Templeton International Services S.à r.l., the Investment Manager is Brandywine Global Investment Management, LLC, and the Depositary is The Bank of New York Mellon SA/NV, Dublin Branch. 	<p>Refer to the "The Company", "Management" and "The Depositary" sections in Paragraphs 1, 3 and 4.4 of the Prospectus for further information on the role and responsibilities of these entities and what happens if they become insolvent.</p>
KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>The value of the product and its dividends or coupons (if any) may rise or fall. 	the product.								
Market and Credit Risks									
<ul style="list-style-type: none"> • You are exposed to market risks – The value of your investments may go up or down due to changing economic conditions or developments regarding individual issuers of debt securities that the Fund invests in. • You are exposed to currency risks – An investment in the shares of the Fund (including hedged share classes) may entail exchange rate risks. If you invest in a share class that is not denominated in SGD and your reference currency is SGD, you may be exposed to additional exchange rate risks. 									
Liquidity Risks									
<ul style="list-style-type: none"> • The Fund is not listed in Singapore and you can redeem your shares only on Dealing Days – There is no secondary market in Singapore for the Fund. All redemption requests may only be made in the manner described in the Prospectus. • Your redemption request may be deferred to subsequent Dealing Days if total redemption requests on a Dealing Day exceed 10% of the Fund's shares in issue. • You will not be able to redeem your shares during any period where redemption is suspended. 									
Product-Specific Risks									
<ul style="list-style-type: none"> • You are exposed to risks of debt securities as this is a fixed income fund – The value of debt securities is likely to decline in times of rising interest rates and vice versa. Other risks include liquidity risk, credit risk, risk of government securities, risk of high yield securities and risk of rated and unrated securities. • You are exposed to derivatives risks – Derivatives in general involve special risks and costs and may result in losses to the Fund. A liquid secondary market may not always exist for the Fund's derivatives positions at any time. In addition, over-the-counter instruments also expose the Fund to risk that a counterparty will not meet its obligations to the Fund which may cause the Fund to suffer a loss. • You are exposed to the risk of investments in absolute funds. <ul style="list-style-type: none"> o The Fund seeks to generate absolute returns over a specified time horizon or independent of market cycles. Investors should not interpret the investment objective for the Fund to imply that positive returns, that are independent of market cycles, are guaranteed and the Fund may be unsuccessful in achieving its objective and may have negative returns. The Fund will seek to mitigate downside risk (although this may not be successful) and therefore is unlikely to participate fully in the upside of a market in the short- and medium-term. o The Fund has high leverage limits. If it uses a high amount of leverage, especially the higher amount permitted in exceptional circumstances, it may have greater losses than would have occurred absent the high leverage.
