KEY RISKS	
WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of the product and its dividends or coupons may rise or fall. These risk factors may cause you to lose some or all of your investment.	Refer to the "Risk Factors" section of the Singapore Prospectus and "Risk Considerations" section of the Luxembourg Prospectus.
Market and Credit Risks

• Your investments are exposed to liquidity risks of the underlying investments – Under exceptional market conditions the manager may be forced to sell assets of the fund at a discount in order to meet continued redemption requests. • The Fund is not listed, and you can realize your Shares only on Dealing Days – There is no secondary market for the Fund. All redemption requests should be submitted in the manner set out in the Prospectus. • Your realization request may be deferred or suspended – Redemptions of Shares may be deferred when more than 10% of the value of the Fund's Shares are redeemed or exchanged on any one Dealing Day. - **You are exposed to risks associated with small and mid-sized companies** – The Fund may invest in small and mid-sized companies, which tend to have less liquidity and be more sensitive to changes in economic conditions and interest rates than larger, more recognized companies. As a result, the stock prices of small and mid-sized companies tend to fluctuate up and down more than those of larger companies.
