<ul style="list-style-type: none"> <li>o debt securities issued or guaranteed by national governments, their agencies or instrumentalities and political sub-divisions;</li> <li>o debt securities of supranational organisations;</li> <li>o corporate debt securities of issuers located in or whose securities are listed or traded on Regulated Markets; and</li> <li>o mortgage-backed securities and asset-backed securities; preferred shares and other open-ended collective investment schemes.</li> <li>• The Fund may purchase securities that at the time of purchase are rated below Investment Grade or if unrated deemed by the Investment Manager to be of comparable quality, so long as such purchase would not cause more than 35% of the Fund's net asset value to be comprised of investments that are rated below Investment Grade or if unrated deemed by the Investment Manager to be of comparable credit quality.</li> <li>• The Fund may invest in securities denominated in local or foreign currency.</li> <li>• The Investment Manager follows a value approach to investing and therefore seeks to identify relative value in the global bond markets. The Investment Manager defines as undervalued those markets where real interest rates are high and the currency is undervalued and stable or appreciating. The Investment Manager's investment approach incorporates analysis of material environmental, social and governance (ESG) issues that may impact an investment's performance. The Investment Manager will concentrate investments in those undervalued markets where cyclical business conditions as well as secular economic and political trends provide the best opportunity for declining interest rates and a return to lower real rates over time.</li> <li>• The Fund will normally hold a portfolio of debt securities of issuers located in a minimum of 6 countries, and the average weighted duration of the Fund's portfolio generally ranges from 1 to 10 years.</li> <li>• The Fund's benchmark index is the FTSE World Government Bond Index (the "<b>Benchmark</b>"). The Fund is actively managed, and the Investment Manager has discretion in selecting investments within the Fund's objective and investment policies. The Investment Manager seeks to provide an average annualised return for the Fund, on a gross basis over rolling 3-year periods, equal to the return of the Benchmark plus 2%. There is no guarantee that the Investment Manager will meet its target, and the targeted return does not take into account the fees charged, which will reduce the Fund's return. The Fund is expected to have similar sector exposure as that of the Benchmark; however, the Benchmark does not constrain how the Investment Manager manages the Fund.</li> <li>• <b>The Fund may also invest in certain types of derivatives for efficient portfolio management purposes and/or investment purposes.</b> The Fund may be leveraged as a result of investment in derivatives. However, the Fund will not be leveraged in excess of 100% of its net asset value.</li> </ul>	<p>further information on the investment strategy of the product.</p>
